Summary

Artificial Intelligence & Data Science undergraduate with research internship experience at IIT Guwahati, contributing to computational software for photogrammetric analysis and scientific computing. Skilled in Python, data analysis, computer vision fundamentals, and modular software development. Passionate about Generative AI, AI Engineering, and building practical software solutions.

Education

Name of Institution	*Qualification*	*CGPA*	*Year of passing*
Lakireddy Bali Reddy College of Engineering	Bachelor of Technology in AI&DS	7.74	Pursuing
Narayana Junior College	Intermediate	9.86	2023
Bhashyam EM High School	SSC	10.0	2021

Internships

Indian Institute of Technology Guwahati – Research Internship July 2026

- Conducted research under the guidance of Prof. Ajay Dashora, focusing on photogrammetric analysis and tree reconstruction models.
- Developed Python-based computational software to evaluate photogrammetric quality using camera geometry, image overlap analysis, and pixel-wise visibility.
- Utilized scientific computing libraries (NumPy, Pandas, Matplotlib) to build algorithms for stereo, transition, and convergent imaging zone classification.
- Generated graphical visualizations and automated CSV-based outputs for the quantitative assessment of 3D reconstruction accuracy.

Projects

Object Surface Photogrammetric Information (OSPI) Corner Calculator |

Python | NumPy | Pandas | Matplotlib ***July 2026*** [🌐]

- Developed a prototype application to evaluate photogrammetric quality using camera geometry and image overlap analysis.
- Implemented stereo, transition, and convergent imaging zone classification using geometric computation.
- Built pixel-wise visibility analysis and convergence-angle evaluation algorithms for OSPI score computation.
- Generated CSV-based outputs and graphical visualizations for quantitative assessment of photogrammetric reconstruction quality.

Emotion-Based Music Recommendation System using Facial Recognition |

Python | TensorFlow | OpenCV | CNN | NumPy ***Mar 2026*** [🌐]

- Developed a real-time facial emotion recognition system using **OpenCV** and **TensorFlow** to classify emotions including happy, sad, angry, and neutral.
- Designed and trained a **Convolutional Neural Network** (CNN) for facial expression classification using image preprocessing and feature extraction techniques.
- Integrated an intelligent **recommendation engine** that generated personalized playlists using detected emotion, user location, and time context.

Skills

Languages: Python, Java and SQL
AI / Scientific Computing: NumPy, Pandas and Matplotlib
Database Management: MySQL
Tools: Git, GitHub, VS Code, Tableau and Microsoft Office

Certifications

- Data Analytics Job Simulation – **Deloitte**
- Oracle Cloud Infrastructure 2025 Generative AI Professional certification - **Oracle**
- The Joy Of Computing Using Python – **NPTEL**
- Cloud Computing Virtual Internship – **APSSDC**
- Python Basic - **HackerRank**
- Java Basic – **HackerRank**
